Jess Peter

Code-loving designer specializing in interaction design, data visualization, and seemingly impossible problems.

Work Experience

2019 – now   **Senior Designer at Thomson Reuters Labs**
- Provided design guidance, front-end development and user research on a variety of projects.
- Worked on both prototypes of early stage products, and enhancements for existing Thomson Reuters products.

2017 – 2019   **Freelancer**
- While completing my Master's at the Oslo School of Architecture and Design, I did freelance work for companies like The Centre for Efective Practice and The Pudding.

2016 – 2017   **Designer/Developer at The Globe and Mail**
- Led design and front-end development on Sophi, The Globe's analytics platform.
- Conducted user interviews and other needs assessment activities to inform design. Developed a React-based website and Chrome browser extension for editors.

2012 – 2016   **Research Assistant at OCADU Research Labs**
- Contributed to various projects conducted by The Mobile Experience Lab and The Visual Analytics Lab.
- Responsible for design, development, research, and writing as needed.

2014 – 2015   **Lead Designer at The Centre for Effective Practice**
- Designed clinical tools for use by primary care providers (PCPs) based on an iterative design process.

Tools

- For **websites and interfaces**, I'm fluent in front-end JavaScript, CSS and HTML.
- For **data processing**, I prefer node.js or Python.
- For **mock-ups and static visuals**, I use Figma, InDesign, Sketch, or whatever is available.
