Jess Peter

Code-loving designer specializing in interaction design, data visualization, and seemingly impossible problems.

Work Experience

2017 – 2019 **Freelancer**
- While completing my Master's at the Oslo School of Architecture and Design, I did freelance work for companies like The Centre for Effective Practice and The Pudding.

2016 – 2017 **Designer/Developer at The Globe and Mail**
- Led design and front-end development on Sophi, The Globe's analytics platform.
- Conducted user interviews and other needs assessment activities to inform design outcomes.
- Developed a React-based website and Chrome browser extension to distribute and explain web traffic data to editors and other stakeholders at The Globe and Mail.

2012 – 2016 **Research Assistant at OCADU Research Labs**
- Contributed to various projects conducted by The Mobile Experience Lab and The Visual Analytics Lab.
- Responsible for design, development, research, and writing as needed.

2014 – 2015 **Lead Designer at The Centre for Effective Practice**
- Designed clinical tools for use by primary care providers (PCPs).
- Participated in an iterative design process where input from PCPs was integrated into tool development.

Tools

- For **websites and interfaces**, I'm fluent in front-end JavaScript, CSS and HTML.
- For **data processing**, I prefer node.js or Python.
- For **mock-ups and static visuals**, I use Illustrator, InDesign, or Sketch.
