Jess Peter

Code-loving designer specializing in interaction design, data visualization, and seemingly impossible problems.

Work Experience

2019 – now **Senior Designer at Thomson Reuters Labs**
- Provided design guidance, data analysis, front-end development and user research on a variety of projects.
- Worked on both prototypes of early stage products, and enhancements for existing Thomson Reuters products.

2017 – 2019 **Freelancer**
- While completing my Master's at the Oslo School of Architecture and Design, I did freelance work for companies like The Centre for Effective Practice and The Pudding.

2016 – 2017 **Designer/Developer at The Globe and Mail**
- Led design and front-end development on Sophi, The Globe and Mail's analytics platform.
- Conducted user interviews and other needs assessment activities to inform design outcomes.
- Developed a React-based website and Chrome browser extension to distribute and explain web traffic data to editors and other stakeholders at The Globe and Mail.

2012 – 2016 **Research Assistant at OCADU Research Labs**
- Contributed to various projects conducted by The Mobile Experience Lab and The Visual Analytics Lab.
- Responsible for design, development, research, and writing as needed.

Tools

- For **websites and interfaces**, I'm fluent in front-end JavaScript, CSS and HTML.
- For **data processing**, I prefer Python with pandas and Matplotlib.
- For **mock-ups and static visuals**, I use Illustrator, InDesign, or Sketch.
